

Pranjali Pandurang Sankpal

Full Stack Software Engineer | Java / Spring Boot / React / Angular / Python | Mumbai, India
sankpranjali@gmail.com | +91-8975410518 | github.com/PRANJALI-SANKPAL | linkedin.com/in/pranjali-sankpal
Open to Pan-India relocation and remote (including remote-from-India)

Summary

Full Stack Software Engineer with 3+ years building Java Spring Boot and Python backends and React/Angular frontends for fintech and data products. Led a MySQL-to-ClickHouse migration on Futuroot cutting query latency about 60% and infra cost about 40%. Comfortable owning UI dashboards through API and data layers on AWS/Docker/Kubernetes. Google Cloud Certified Professional Cloud Developer and Architect.

Technical Skills

Languages: Java, Python, JavaScript, TypeScript, SQL; Go (learning)
Backend: Spring Boot, Spring Data JPA, Django, REST APIs, GraphQL, Microservices
Frontend: React, Redux, Angular, Highcharts
Data: MySQL, PostgreSQL, ClickHouse, Redis, MongoDB
Messaging: Kafka, RabbitMQ
Cloud & DevOps: AWS, Docker, Kubernetes, CI/CD, Git, Maven
Practices: REST API Design, UI Integration, Code Review, Production Debugging, Agile

Experience

Software Engineer (Consultant), Percipere Jul 2025 – Present
Mumbai, India

- Build full-stack features for Futuroot (data mining and fintech): Java Spring Boot and Python backends with Angular and Highcharts dashboards.
- Diagnosed slow MySQL analytics queries; led and completed migration to ClickHouse, cutting query latency about 60% and infra cost about 40%.
- Built MCP-based chatbot tooling for platform access; design/consume REST APIs; Dockerize services; review code and debug production issues.

Software Engineer, Valiance Solutions Nov 2023 – Jun 2025
Delhi NCR, India

- Led frontend delivery for KM-Intelligence (Malaysia client) in React; Django, GraphQL, MongoDB backend for unstructured data.
- Built the banking Demand Planning Platform backend (Java, Spring Boot, PostgreSQL, Redis, AWS) and connected it to platform workflows.
- Shipped full-stack features across fintech and logistics platforms (Java/Python/Node and React where needed).
- Implemented Kafka and RabbitMQ async workflows; production debugging; mentored junior engineers.

Frontend Developer Intern, KJSS Cosmos Jul 2023 – Nov 2023
Mumbai, India

- Built a role-based enterprise procurement platform in React/Redux with multi-level permissions and REST API integration.

Projects

Futuroot (full stack + ClickHouse) Percipere — Angular/Highcharts dashboards plus Java/Python backend; MySQL to ClickHouse (about 60% / 40%).

KM-Intelligence Valiance Solutions — React frontend lead plus Django/GraphQL/MongoDB backend planning and implementation.

Demand Planning Platform Valiance Solutions — Java Spring Boot banking backend with PostgreSQL, Redis, and AWS.

Open Source Contributions

GitLab – Contributor Mar 2025 – Present

- Merged MRs on gitlab-org/gitlab: Snooze until next week, Geo sync when Git HTTP disabled, Case-insensitive custom status index.

Education

Sandip University, Nashik – B.Tech Aerospace Engineering (CGPA 8.57/10) Aug 2018 – Sept 2022

Certifications

- Google Cloud Professional Cloud Developer
- Google Cloud Professional Cloud Architect
- AWS Certified Solutions Architect – Associate (SAA-C03): In Progress
