

Pranjali Pandurang Sankpal

Backend Software Engineer | Java / Spring Boot / Python | Mumbai, India

sankpranjali@gmail.com | +91-8975410518 | github.com/PRANJALI-SANKPAL | linkedin.com/in/pranjali-sankpal

Open to Pan-India relocation and remote (including remote-from-India)

Summary

Backend Software Engineer with 3+ years of hands-on experience building Java Spring Boot and Python services for fintech and data products. Led a MySQL-to-ClickHouse migration on Futuroot cutting query latency about 60% and infra cost about 40%. Experience with REST APIs, PostgreSQL/MySQL, Redis, Kafka/RabbitMQ, and AWS/Docker/Kubernetes. Google Cloud Certified Professional Cloud Developer and Architect.

Technical Skills

Languages: Java, Python, SQL, JavaScript, TypeScript; Go (learning)

Backend: Spring Boot, Spring Data JPA, Django, REST APIs, Microservices, GraphQL

Data: MySQL, PostgreSQL, ClickHouse, Redis, MongoDB

Messaging: Kafka, RabbitMQ

Cloud & DevOps: AWS, Docker, Kubernetes, CI/CD, Git, Maven

Practices: REST API Design, Database Design, Code Review, Production Debugging, Agile

Experience

Software Engineer (Consultant), Percipere

Jul 2025 – Present

Mumbai, India

- Build Java Spring Boot and Python backend services for Futuroot (data mining and fintech), from design through production.
- Diagnosed slow MySQL analytics queries; led and completed migration to ClickHouse, cutting query latency about 60% and infra cost about 40%.
- Design and consume REST APIs across services; package workloads with Docker; review code and debug production issues.
- Built MCP-based internal chatbot tooling for platform access; support Dockerized data and ops scripts.

Software Engineer, Valiance Solutions

Nov 2023 – Jun 2025

Delhi NCR, India

- Designed and built the Demand Planning Platform backend (Java, Spring Boot, PostgreSQL, Redis, AWS) for banking/fintech workflows.
- Led backend planning and implementation for KM-Intelligence (Malaysia client) using Django, GraphQL, and MongoDB.
- Added Kafka and RabbitMQ event-driven workflows for reliable asynchronous processing across services.
- Shipped REST APIs across production fintech and logistics platforms; traced failures through logs and tuned slow paths.
- Mentored junior engineers on delivery and code quality in Agile sprints.

Frontend Developer Intern, KJSS Cosmos

Jul 2023 – Nov 2023

Mumbai, India

- Built a role-based enterprise procurement platform in React/Redux with REST API integration.

Projects

ClickHouse Migration *Futuroot / Percipere*

Moved analytics from MySQL to ClickHouse; about 60% lower query latency and about 40% lower infrastructure cost.

Demand Planning Platform *Valiance Solutions*

Banking-domain Java Spring Boot backend with PostgreSQL, Redis, and AWS in production.

KM-Intelligence *Valiance Solutions*

Backend planning and implementation with Django, GraphQL, and MongoDB for a Malaysia client.

Open Source Contributions

GitLab – Contributor

Mar 2025 – Present

- Merged MRs on gitlab-org/gitlab: Snooze until next week, Geo sync when Git HTTP disabled, Case-insensitive custom status index.

Education

Sandip University, Nashik – B.Tech Aerospace Engineering (CGPA 8.57/10)

Aug 2018 – Sept 2022

Certifications

- Google Cloud Professional Cloud Developer
- Google Cloud Professional Cloud Architect
- AWS Certified Solutions Architect – Associate (SAA-C03): In Progress
